Foreword, by Ivor Grattan-Guinness .....	v
Preface .....	ix
Illustrations .....	xix
Maps of Central Europe .....	xxii

## Part One: Debut

Introduction .....	1
<b>1 School, University, Strife</b> .....	3
1.1 Coming of Age in Warsaw .....	3
1.2 Well-Ordered Sets .....	15
<b>2 A Contribution to the Axiomatics of Well-Ordered Sets (1921)</b> .....	19
<b>3 Doctoral Research</b> .....	31

## Part Two: Geometry

Introduction .....	43
<b>4 Area, Volume, Measure</b> .....	45
4.1 Area and Volume .....	45
4.2 The Measure Problem .....	51
4.3 Equidecomposability in the Plane .....	58
4.4 The Banach–Tarski Theorems .....	64
<b>5 On the Equivalence of Polygons (1924)</b> .....	77
5.1 §1 .....	80
5.2 §2 .....	83
5.3 §3 .....	84
5.4 Summary .....	90

<b>6</b>	<b><i>On Decomposition of Point Sets into Respectively Congruent Parts (1924)</i></b> . . . . .	93
6.1	General Properties of Equivalence by Finite or Denumerable Decomposition . . . . .	96
6.2	The Fundamental Theorems about Equivalence by Finite Decomposition . . . . .	106
	A. Euclidean Space with One or Two Dimensions . . . . .	106
	B. Euclidean Space of Three (and More) Dimensions . . . . .	109
	C. The Surface of a Sphere . . . . .	112
6.3	The Fundamental Theorems about Equivalence by Denumerable Decomposition . . . . .	115
<b>7</b>	<b>Degree of Equivalence of Polygons</b> . . . . .	125
7.1	Introduction . . . . .	126
7.2	<i>The Degree of Equivalence of Polygons (1931)</i> . . . . .	135
7.3	Moese's Contribution (1932) . . . . .	144
7.4	<i>Remarks on the Degree of Equivalence of Polygons (1932)</i> . . . . .	151
<b>8</b>	<b>Research Threads</b> . . . . .	159
8.1	Two Threads in Logic . . . . .	160
8.2	Thread: Well-Ordering and Finiteness . . . . .	161
8.3	Thread: Cardinal Arithmetic and the Axiom of Choice . . . . .	161
8.4	Thread: Application of Set Theory to Geometry . . . . .	162
8.5	Equidecomposability in Elementary Geometry . . . . .	162
8.6	Equidecomposability in Set Theory . . . . .	163
8.7	The Measure Problem . . . . .	165
8.8	Generalizing Cantor–Bernstein . . . . .	167

## Part Three: Teaching

	<b>Introduction</b> . . . . .	169
<b>9</b>	<b>Career and Family</b> . . . . .	171
9.1	Employment and Marriage . . . . .	171
9.2	Teaching Geometry . . . . .	179
9.3	Teaching Teachers . . . . .	184
9.4	Research Seminars . . . . .	194
9.5	Warsaw/Poznań Congress, 1929 . . . . .	200
9.6	Organizations and Journals for Teachers . . . . .	203
9.7	<i>Parametr</i> and <i>Młody Matematyk</i> . . . . .	204
9.8	Tarski's Contributions to <i>Parametr</i> and <i>Młody Matematyk</i> . . . . .	211
9.9	Tarski's Coauthored Textbook <i>Geometria</i> . . . . .	214

**10 Congress of Mathematicians of Slavic Countries (1929) . . . . . 225**

**11 Circumference of a Circle (1932) . . . . . 229**

**12 Exercises Posed by Tarski . . . . . 243**

    12.1 Diluting Wine . . . . . 249

    12.2 Iteration of the Absolute Value Symbol . . . . . 250

    12.3 Decomposition into Factors . . . . . 251

    12.4 Interesting Identity . . . . . 253

    12.5 Exercise 118 . . . . . 255

    12.6 Equidistant . . . . . 256

    12.7 System of Inequalities . . . . . 257

    12.8 Another System of Inequalities . . . . . 259

    12.9 Cutting a Rectangle Out of a Square . . . . . 261

    12.10 The Degree of Equivalence of Polygons . . . . . 263

    12.11 Postulate about Parallels . . . . . 264

    12.12 Analytic Geometry of Space . . . . . 268

    12.13 Stereometry . . . . . 268

    12.14 Arranging Two Segments in a Plane . . . . . 271

**13 *Geometry for the Third Gimnazjum Class (1935)* . . . . . 273**

    13.1 §1 Circle and Disk . . . . . 277

    13.2 §2 Construction Problems . . . . . 279

    13.3 §3 Relative Positions of a Circle and a Line Lying in a Plane . . . . . 281

    13.4 §4 Construction Problems . . . . . 285

    13.5 Summary of §5–§24 . . . . . 291

    13.6 §25 Incommensurable Segments—Irrational Numbers . . . . . 292

    13.7 §26 Measuring Incommensurable Segments with a Unit . . . . . 296

    13.8 §27 Rational Approximations of Irrational Numbers  
         —Operations on Irrational Numbers . . . . . 297

    13.9 Summary of §28–§32 . . . . . 301

    13.10 §33 Equivalent Polygons . . . . . 302

    13.11 §34 On Measuring Areas of Polygons . . . . . 304

    13.12 §35 Areas of Similar Polygons . . . . . 316

**14 Teaching and Logic—to the New World . . . . . 319**

    14.1 Teaching . . . . . 319

    14.2 Logic . . . . . 321

    14.3 To the New World . . . . . 330

    14.4 Epilogue . . . . . 336

## Part Four: Supplement

<b>Introduction</b> .....	337
<b>15 Assorted Contributions</b> .....	339
15.1 Discussion of Łukasiewicz 1925, on Understanding Deduction .....	340
15.2 Discussion of Greniewski [1927] 1928, on Action .....	341
15.3 Discussion of Czeżowski [1927] 1928, on Causality .....	343
15.4 Łukasiewicz 1928–1929, on Definitions .....	346
15.5 Tarski 1929, on Polish Pensions .....	349
15.6 Tarski 1930–1931, on the Concept of Truth .....	356
15.7 Tarski 1932, on Banach’s Measure .....	363
15.8 Discussion of Ajdukiewicz 1936, on Idealism .....	365
15.9 Discussion of Wilkosz 1936, on the Significance of Logic .....	367
15.10 Discussion of Zawirski 1936b, on Synthesis .....	370
15.11 Discussion of Kokoszyńska 1936a, on Relative Truth .....	374
15.12 Two Letters to Sierpiński, 1946–1947 .....	376
<b>16 Posthumous Publications</b> .....	385
16.1 Papers .....	385
16.2 Monographs .....	390
16.3 Letters .....	392
<b>17 Biographical Studies</b> .....	399
<b>18 Research Surveys</b> .....	411
18.1 1986, 1988 JSL Surveys .....	411
18.2 Other surveys .....	413
<b>Bibliography</b> .....	421
<b>Permissions</b> .....	473
<b>Index of Persons</b> .....	477
<b>Index of Subjects</b> .....	485
