

Hines 1997 Project Bibliography

- Acton, Harry Burrows. 1967. Hegel, Georg Wilhelm Friedrich (1770–1831). *The Encyclopedia of Philosophy*, volume 3, edited by Paul Edwards, 435–451. New York: Macmillan. Acton, a noted British philosopher, lived 1908–1974.
- Beck, Matthias, and Ross Geoghegan. 2010. *The Art of Proof: Basic Training for Deeper Mathematics*. New York: Springer.
- Dauben, Joseph W. 1979. *Georg Cantor: His Mathematics and Philosophy of the Infinite*. Cambridge, Massachusetts: Harvard University Press. xiv+404 pages. Cited in the comments on Hines' preface.
- Dedekind, [1888] 1963. *Essays on the Theory of Numbers*. Translated by W. W. Beman. New York: Dover Publications. Originally published in 1888 as *Was sind und was sollen die Zahlen*, Braunschweig: F. Vieweg. This translation was originally published in 1901 by Open Court.
- Hines, Jerome. 1997. *Primal Mathematics: A Theory of Unachievably Large Numbers and Metamorphic Sets*. Manuscript, 249 pages.
- Hines, Pamela Trainor. 2009. *America's Basso*. New York: Eloquent Books. 276 pp.
- Huntington, Edward V. 1905. A set of postulates for ordinary complex algebra. *Transactions of the American Mathematical Society* 6: 209–229.
- Jacobson, Nathan. 1951. *Lectures in Abstract Algebra*. Volume 1: *Basic Concepts*. Princeton: D. Van Nostrand. xii+217 pages.
- Karp, Carol R. 1964. *Languages with Expressions of Infinite Length*. Amsterdam: North-Holland. xx+183 pp.
- Keisler, H. Jerome. 1986. *Elementary Calculus: an Infinitesimal Approach*. Boston: Prindle, Weber & Schmidt. xi+913+65 pages.
- MacLane, Saunders, and Garrett Birkhoff. 1967. *Algebra*. New York: The Macmillan Company. xix+598 pp.
- Maybee, Julie E. 2020. Hegel's Dialectics. In Zalta & Nodelman 2022. Maybee is a noted American philosopher.
- Meyer, Walter. 2022. The birth of undergraduate modern algebra in the United States. In Zack & Schlimm 2022, 167–183.
- Milne, William J. 1881. *The Inductive Algebra, Embracing a Complete Course for Schools and Academies*. New York: American Book Company. 347 pp.
- Moise, Edwin E., and Floyd L. Downs, Jr. 1964. *Geometry*. Reading, Massachusetts: Addison-Wesley. xiv+378 pages.
- Monna, A. F. 1972. The concept of function in the 19th and 20th centuries, in particular with regard to the discussions between Baire, Borel, and Lebesgue. *Archive for History of Exact Sciences* 9: 57–85. Cited in the comments on Hines' preface.
- Oakeshott, Michael. 1933. *Experience and Its Modes*. Cambridge: The University Press. 376 pages. Oakeshott, a noted British philosopher, lived 1901–1990.
- Niven, Ivan. 1969. Formal power series. *American Mathematical Monthly* 76: 877–899.
- Priest, Graham, Koji Tanaka, and Zach Weber. 2022. Paraconsistent logic. In Zalta & Nodelman 2022.

- Ray, Joseph. 1880. *Ray's New Higher Arithmetic*. New York: American Book Company. viii+408 pp. Ray lived 1807–1855. Ray's textbooks were very popular.
- Reicher, Maria. 2022. Nonexistent objects. In Zalta & Nodelman 2022.
- Robinson, Abraham. 1966. *Non-Standard Analysis*. Amsterdam: North-Holland. xi+293 pages.
- Rosen, Kenneth H. 2003. *Discrete Mathematics and Its Applications*. Boston: McGraw Hill. xxi+787+9+8+83+1+18 pp.
- Russell, Bertrand. [1903] 1937. *The Principles of Mathematics*. Second edition. London: G. Allen & Unwyn. xxxix+534 pp.
- Russell, Bertrand. 1905. On denoting. *Mind* (new series) 14: 479–493.
- Scanlan, Michael. 1991. Who were the American postulate theorists? *Journal of Symbolic Logic* 56: 981–1002.
- Toader, Iulian. 2021. Permanence as a principle of practice. *Historia Mathematica* 54: 77–94.
- Van der Waerden, B. L. [1931] 1940. *Modern Algebra. In part a development from lectures by Emil Artin and Emmy Noether*. Two volumes. Translated from the second German edition by Fred Blum and Theodore J. Benag. Revised English edition. New York: Frederick Ungar.
- Walker, Robert J. 1950. *Algebraic Curves*. Princeton: Princeton University Press. x+201 pp.
- Wang Hao. 1957. The axiomatization of arithmetic. *Journal of Symbolic Logic* 22: 145–158.
- Weber, Heinrich. [1894–1898] 1981. *Lehrbuch der Algebra*. Three volumes. Third edition. New York: Chelsea Publishing Company. xv + 703 + xvi + 855 + xvi + 731 pages. Originally published by F. Vieweg und Sohn.

Leftovers

- Fish, Daniel W. 1883. *Arithmetic, Oral and Written. Number Two. Upon the Inductive Method*. New York: American Book Company. 352 pp.
- Gallian, Joseph A. 1994. *Contemporary Abstract Algebra*. Lexington, Massachusetts: D. C. Heath. This has a more extensive discussion of the same, on pp. 251–254.

Peano, Giuseppe. 1973. *Selected works of Giuseppe Peano*. Translated and edited, with a biographical sketch and bibliography, by Hubert C. Kennedy. Toronto: University of Toronto Press.

Peano, Giuseppe. [1889] 1973. *The Principles of Arithmetic, Presented by a New Method*. Translated by Hubert C. Kennedy. In Peano 1973, 101–134. Translation of *Arithmetices Principia, Nova Methodo Exposita*, Turin: Fratres Bocca.

Wikipedia. 2024. Floor and ceiling functions. https://en.wikipedia.org/wiki/Floor_and_ceiling_functions.

0. *Preface*

- a. page 2P: Nominalism & Chwistek
- b. pages 4P,5P: Plurals, countable nouns. There are leads in Stanford.
- c. page 8P: Properties & extensions. I bought Martin's logic & rhetoric.
